Notification to the European Classification and Labelling Inventory

Dear Sir or Madame,

Beside the registration of Tier 1 substances under REACH until 1st of December 2010 there was another important deadline on 3rd of January 2011. Every manufacturer/importer is required to notify REACH-registrable substances or substances with hazardous properties to the European Inventory for Classification and Labelling (C&L-notification). This notification is independent from the REACH registration deadline and applies to every manufacturer or importer. It applies to all REACH-relevant substances on their own or in preparations and hazardous substances independent from the import volume.

Please note that for all substances every importer has its own duty to notify relevant substances to the C&L inventory. Neither Elastron Kimya A.S. nor Pulver Kimya International GmbH, as the Only Representative (OR) according to article 8 of the Regulation (EC) 1907/2006 of 18th December 2006, are allowed to notify non-Tier 1 substances to the C&L inventory.

However, Pulver Kimya International GmbH has initiated in a group notification as importer the notification of all relevant substances to the European Inventory for Classification and Labelling.

Therefore, all products supplied by Elastron Kimya A.S. to EU importers are in compliance with REACH and CLP.

We hope this information is useful and is answering your request.

Sincerely,

**Pulver Kimya International GmbH
